The listing of sale results in this supplement are presented alphabetically by operator. The data also is available in MS Excel format for \$100. The Excel file contains the estimated water depth information included in this printed version, which is not provided by the MMS. We also have available the entire inventory of federal Gulf of Mexico leases in their primary term along with their current drilled status. For additional information and prices, contact us at the address below, or e-mail research@ods-petrodata.com.
